

FOR IMMEDIATE RELEASE

Ultimate Data Security for Everyone

RANGER FP-II Security Hard Disk

Singapore, 1st November 2009 – At a time when privacy and security is being compromised, RANGER features its second generation of hard disks featuring biometric technology. This nifty device prohibits unauthorized access and provides security through encryption, allowing you to access your hard disk through leading biometric fingerprint and password technology.

The RANGER FP-II hard disk is divided into a public and private partition. To access the private partition, the user simply swipes their finger over the sensor and the drive unlocks. If the drive is stolen or misplaced, the user will not have to worry about their sensitive & private information being viewed by others. Without the fingerprint or password, the hard disk only displays the public partition when plugged into a computer.

When the hard disk is plugged in the first time, the owner can register up to **10 fingerprints** – either for themselves or for multiple users. A **password** is also registered for additional security. Once that is done, the drive is ready to be used.

Peace of mind and convenience are priorities for RANGER. In addition to the security features, the FP-II is designed with a **full PCB board**, which secures the SATA hard disk and makes it less prone to breakdown. It also features a **USB 2.0 interface** and **one touch backup**. For those that want the best, the FP-II is available in 320GB and 500GB at **SITEX 2009**.

[Booth 5G50, Singapore Expo Hall 5].

Features:

- ❑ Ultimate data security with fingerprint & password access
- ❑ High speed USB 2.0 data transfer
- ❑ Plug & play; No external power required
- ❑ One button file backup
- ❑ Secured mounting of hddisk on full PCB board

Specifications:

Dimensions	78mm x 130mm x 15.2mm
Weight	172 grams (including hard disk)
Transfer Rate	480Mbps
Hard Disk Type	2.5" SATA HD
Interface	USB 2.0
Price	320Gb - \$348 500Gb - \$369 Freebies can be expected (tba)

About RANGER Technology: The RANGER brand is a wholly owned subsidiary of Systems Technology Pte Ltd (Systech). The brand was first established in 1990 and became one of the pioneer brands of personal computers in Singapore. The RANGER brand currently carries products in four main categories: Portable Storage, Digital Imaging, Wi-Fi & Communications and Accessories. Presently, RANGER is recognized as an affordable and trusted brand of IT products. Our portable hard disks are reputed in the market for its excellent quality inside and out. Looking ahead, RANGER aims to be the number one IT lifestyle brand in terms of range and quality.
